

PARUL UNIVERSITY
FACULTY OF ENGINEERING & TECHNOLOGY
B.Tech. Summer 2022-23 Examination

Semester: 6**Subject Code: 203105395****Subject Name: Software Testing & Quality Assurance****Date: 28/03/2023****Time: 10:30 am to 01:00 pm****Total Marks: 60****Instructions:**

1. All questions are compulsory.
2. Figures to the right indicate full marks.
3. Make suitable assumptions wherever necessary.
4. Start new question on new page.

Q.1 Objective Type Questions(All are compulsory) (Each of one mark) (15)

1. Which is a type of software testing that verifies stability & reliability of software application.
(a) Performance Testing (b) Stress Testing (c) Load Testing (d) Beta Testing
2. ----- is done to make sure the software can handle the expected load over a long period of time.
3. What is also known as cause effect table
(a) Decision table (b) Cyclomatic complexity (c) Boundary value analysis (d) None of this
4. ----- are the quantitative measures used to estimate the progress, quality, productivity and health of the software testing process.
5. CMM stands for?
6. Data Flow Testing is a type of ----- testing.
7. Which is a software phenomenon that can cause to behave improperly as per its specification
(a) Error (b) Mistake (c) Fault (d) Failure
8. ----- research focuses on what the consumer is doing, not what the object is doing.
9. ----- is a type of software testing that verifies stability & reliability of software application.
10. In Client server testing SLA stands for?
11. Which is a document in which all the risk analysis activities are described
(a) CMMM Plan (b) TQM Plan (C) SPICE (d) RMMM Plan
12. ----- is a document that describe scope, approach, resources in a test activities.
13. Which type of testing will be done at customer site?
14. Group of associated tests that are database-related and typically run together is often referred as
15. Fault based testing & scenario based testing is a type of ----- testing method.

Q.2 Answer the following questions. (Attempt any three) (15)

- A) What is decision table? Draw decision table for login screen?
- B) Explain Software risk with an example?
- C) Differentiate Verification & Validation.
- D) Explain Random testing with suitable example?

Q.3 A) Explain in detail Cyclomatic complexity with an suitable example? (07)

- B) What are the primary objective when we test a software. Briefly outline the requirement specification of an ATM. Write the test cases on ATM transactions? (08)

OR

- B) Explain Levels of testing with suitable diagram? (08)

Q.4 A) Difference between black box & white box testing. (07)

OR

- A) Explain RMMM Plan in detail? (07)

- B) Draw and explain McCalls Quality Factor in detail? (08)
