

UNIT-2

Data Preprocessing

ASSIGNMENT

Unit 2: Data Preprocessing

ASSIGNMENT

1. Explain the need and importance of Data Preprocessing in Data Science.
2. Discuss methods for handling missing values in datasets.
3. Explain data manipulation operations such as sorting, grouping, and ranking.
4. Write steps for reading, selecting, and filtering data in R.
5. Compare filtering, rearranging, and grouping of data with examples.
