Introduction to Internet of Things

Assignment-Week 8

TYPE OF QUESTION: MCQ/MSQ

Number of questions: **15** **Total marks: 15 X 1= 15**

`

QUESTION 1:

Which of the following abstracts the physical resources from the network services?

a. Path management
b. Routing protocols
c. Flow-table paradigm
d. Network Virtualization

Correct Answer: d. Network Virtualization

Detailed Solution: Network Virtualization abstracts the physical resources from the network services (Please refer Lecture 36@3:59)

QUESTION 2:

In which of these, exact match rules are useful?

a. Elephant Flow

b. Mice-flow

c. Both a and b

d. Neither a nor b

`

Correct Answer: a. Elephant Flow

Detailed Solution: In Elephant Flow, exact match rules are useful. (Please refer Lecture 36@17:45)

QUESTION 3:

Which of these takes last k-th location instances to predict the next location?

a. Odin-k Markov Predictor
b. Order-k Markov interpreter
c. Order-k Markov predictor
d. None of these

Correct Answer: c. Order-k Markov predictor

Detailed Solution: Order-k Markov predictor takes last k-th location instances to predict the next location. (Please refer Lecture 36@15:47)

QUESTION 4:

Which of the following is an important issue due to the dynamic nature of the IoT network?

a. Match rules
b. Load rules
c. Match balancing
d. Load Balancing

Correct Answer: d. Load Balancing

`

Detailed Solution: Load Balancing is an important issue due to the dynamic nature of the IoT network. (Please refer Lecture 36 @17:09)

QUESTION 5:

Fill in the blank.

_____ refers to heterogeneous computing nodes distributed over a wide area to perform very large tasks.

a. Cluster Computing
b. Utility Computing
c. Grid Computing
d. None of these

Correct Answer: c. Grid Computing

Detailed Solution: Grid Computing refers to heterogeneous computing nodes distributed over a wide area to perform very large tasks. (Please refer Lecture 37 @6:48)

QUESTION 6:

Which of the following is a type of service model in cloud computing?

a. SaaS
b. PaaS
c. IaaS
d. All of these

Correct Answer: d. All of these

`

Detailed Solution: All these are a type of service model in cloud computing. (Please refer Lecture 37@25:18)

QUESTION 7:

Which of the following statements are true about SaaS?

Statement I: Applications are available as 'services'.

Statement II: End-users do not have the control of the cloud infrastructure.

Statement III: Services can be accessed by various types of client devices.

a. Statements I and II
b. Statements I and III
c. Statements II and III
d. Statement I, II and III

Correct Answer: d. Statements I, II and III

Detailed Solution: All the three statements are correct for the SaaS. Applications are available as 'services'. End-users do not have the control of the cloud infrastructure. Services can be accessed by various types of client devices.

(Please refer Lecture 37@26:01)

`

QUESTION 8:

Fill in the blank.

_____ means independent of device or location.

a. Scalable
b. Reliability
c. Agile
d. Ubiquitous

Correct Answer: d. Ubiquitous

Detailed Solution: Ubiquitous means independent of device or location. (Please refer Lecture 37@18:06)

QUESTION 9:

Fill in the blank.

_____ provides the platform which allows developers to create applications which can be offered as a service via the Internet.

a. Software-as-a-Service
b. Storage-as-a-Service
c. Network-as-a-Service
d. Platform-as-a-Service

Correct Answer: d. Platform-as-a-Service

Detailed Solution: Platform-as-a-Service provides the platform which allows developers to create applications which can be offered as a service via the Internet. (Please refer Lecture 38@11:35)

`

QUESTION 10:

Fill in the blank. 'Dynamic scaling of the required infrastructure resources' is a feature of which of the essential characteristic of cloud computing.

a. Scalability

b. Availability

c. Synchronization

d. None of these

Correct Answer: a. Scalability

Detailed Solution: 'Dynamic scaling of the required infrastructure resources' is a feature of scalability characteristics of cloud computing. (Please refer Lecture 38@7:41)

QUESTION 11:

Software-as-a-Service does not support a fully pay-as-you-go model.

a. True
b. False

Correct Answer: b. False

Detailed Solution: Software-as-a-Service supports a fully pay-as-you-go model. (Please refer Lecture 38@13:25)

`

QUESTION 12:

What is the meaning of the Host Level Security at PaaS and SaaS level?

a. Hide host OS from the end users
b. Security responsibilities are transformed to Cloud service providers
c. Both a and b
d. Neither a nor b

Correct Answer: c. Both a and b

Detailed Solution: Both a and b. (Please refer Lecture 39@19:23)

QUESTION 13:

Which of the following is an objective of Data Security?

a. Confidentiality
b. Integrity
c. Availability
d. All of these

Correct Answer: d. All of these

Detailed Solution: The three objectives of Data Security are Confidentiality, integrity and availability. (Please refer Lecture 39@22:39)

`

QUESTION 14:

CloudSim provides a cloud environment.

a. True
b. False

Correct Answer: a. True

Detailed Solution: CloudSim provides a cloud environment.. (Please refer Lecture 40@8:27)

QUESTION 15:

Which of the following is true about GreenCloud?

a. GreenCloud cannot monitor the energy consumption of servers, switches, etc.
b. GreenCloud was developed as an extension of GO.
c. Neither a nor b
d. Both a and b

Correct Answer: c. Neither a nor b

Detailed Solution: GreenCloud monitors the energy consumption of servers, switches, etc. It was developed as an extension of NS2. (Please refer Lecture 40@16:25)
